

THE WEATHER.
Fair Wednesday and Thursday.

Editorial Comment

Lieut. Fonck, the French aviator, has broken all records by bringing down his 60th plane.

Eighteen States, not including Kentucky, are called upon to furnish 5,700 men Sept. 1 for instruction in special lines of service.

Among our recent visitors was a French gentleman who was very proud of his English. At a large reception given in their honor he was expressing his unbounded admiration of American women to his hostess. After extolling on their beauty and wit he clasped his hands and with an added burst of rapture said, "And they are particularly beautiful in zero night clothes." — Exchange.

YANK LANDS SAFELY IN DUTCH POTATO PATCH.

The Hague, Aug. 19.—Ryan Harris of Afton, N. C., the American aviator who made an involuntary descent Friday in a potato field near Kouderekerk, Zeeland, after his machine had been hit by gunfire, has arrived here from Flushing to be interviewed.

Harris, who was uninjured, ascended somewhere in northern France with a Scotchman. James Munro, and was busy dropping bombs on the Bruges docks from an altitude of 13,000 when a shell splinter hit his machine in a vital part. The motor worked so poorly that the aviators calculated it would be impossible for them to make Nieuport, their first home base, so they made a long glide with the intention of landing on Dutch territory. Their machine came to earth between Kouderekerk and Flushing in a field from which the harvesters had just departed. Neither Harris nor Munro received a scratch. Harris warmly praised the kindly reception both got from the Zeeland country folks.

FOLLOWING THE FLAG

Lieut. Page Blakemore has arrived safely in France.

Lieut. Stanley Stroube, M. R. C., is at home on a five-days furlough. He has received his overseas outfit and expects to sail soon.

The statement that Lieut. Eager was the first Hopkinsville officer to arrive in France, was a mistake, several doctors from here having preceded him by several months.

Lieut. John W. Breathitt has completed his course of instruction in aviation and is now a graduate ready for flying. He is here on a ten days' leave, and expects to receive orders while here. He has made many flights alone and is immensely pleased with the line of work in which he is to serve his country.

THOMAS ROBERTS BAGS A HUN

Lieut. Thos. D. Roberts, in a letter to his parents at Gracey, tells of an experience at the front. He had gone into "No Man's Land" on an errand at night and was returning as he thought unobserved when a bullet struck the ground about eighteen inches to his right. Wheeling about he saw German close by him. He adds: "I made two shots and the second shot the Hun started to kicking up daisies and I think he will continue to do so."

He returned to his trench unharmed.

PATRIOTIC MEETING SUNDAY.

The "Little Sunbeams," of Bell Station will give a patriotic entertainment at the Grange Hall Sunday afternoon at four o'clock. Judge James B. Allensworth will deliver an address. The meeting is to be in behalf of the Belgian Relief Fund, the Woman's Committee of the Council of National Defense. The public is invited.

TONSILS REMOVED.

Dixie Wilts, son of Mr. and Mrs. Dixie Wilts, of near Fairview, was operated upon at Jennie Stuart yesterday morning, having his tonsils removed. He is doing nicely but will remain at the hospital for several days till he is on the road to a complete recovery.

ALLIED VICTORY GROWS

GEN. MANGIN MOPPING UP WITH HUNS

(By Associated Press)

With French Army in France, Aug. 20.—The attack of Gen. Mangin's forces from Fontenoy to Pimprez, on the Oise, was progressing favorably when this dispatch was filed.

Prisoners of war are continuing to arrive to the rear, add to several thousand captured before noon and the gain of territory at one o'clock had been from one to two and a half miles.

The enemy is resisting with the greatest vigor at vital points.

Where the fighting is heaviest the ground is covered with German dead.

THE GERMAN SUBS.

From authoritative sources it is learned that there is reason to believe that three German submarines have been operating on the American coasts at three separate points. Two of these have recently "ceased operating," either because their stores have become exhausted or as a result of damage received in contact with the patrol fleet.

It is known that the activities of one boat ceased immediately after a destroyer reported having discharged depth bombs near the spot where the submarine submerged.

One of the three submarines, it is considered certain, was especially equipped for duty as a cable cutter. This is held to explain the sudden parting recently of two Atlantic cables. A naval repair ship, escorted by fighting craft, has picked up and spliced both cables.

Descriptions of submarines operating in American waters, almost without exception, give their length as 300 feet and their armament as two guns of either 5.7 or 5.9 inch caliber.

Naval experts adduce from other information that the enemy craft have a cruising radius of not less than 17,000 miles.

The German admiralty now has in commission between 160 and 180 submarines, while the total number destroyed by the allies has passed the 200 mark, according to the most reliable information available here.

If correct, these figures would indicate that new German construction has barely held its own over the period of four years, as at the beginning of the war the Germans are known to have had about 150 submarines.

The toll in the last six months, however, has been many times that attained in any previous period and the constantly increasing allied anti-submarine forces, according to naval officials, will put the ratio continually higher as time passes.

BRITISH STILL ADVANCING

London, August 20.—East of Arras along the Scarpe river the British in sharp fighting have advanced their line slightly to the east of the village of Fampoux, while further south, astride the Lys river, the British have reached Lepinette and north of Merville have captured the villages of Vierhoek and Lacouronne, according to Field Marshal Haig's communication from headquarters.

ACTRESS WEDS ACTOR SHE KNEW ONLY TWO HOURS.

New York, Aug. 19.—Robert Taylor, the Shakespearean actor, first husband of Julia Marlowe, met Miss Irene Hayes, a member of the Ziegfeld Follies, Friday at 10 a. m. and at 2 o'clock in the afternoon they were married by City Clerk Scully. Taylor recently returned from France where he has been entertaining the soldiers. After a brief honeymoon he will return to the front with his wife. Both will devote themselves to war work.

W. T. DOUGHERTY, Chairman, Agricultural Committee.

"Good roads made it possible to consolidate or centralize the schools and to establish graded schools in the rural districts. Such schools will accommodate all the children within a radius of four or five miles."

U. S. MARINES RETURNING FROM THE TRENCHES

This picture shows a detachment of American marines passing through a village in France after having done active duty in the trenches. Note the camouflage strips to hide their movements.

FARMERS AND PATRIOTS TAKE NEW SCHOOL FOR OFFICERS

APPEAL MADE FOR A BIG DISPLAY OF AGRICULTURAL PRODUCTS NEXT WEEK.

Chairman Dougherty, of the Agricultural Committee of the Pennyroyal Fair, which opens next week, is out in an appeal to farmers to see that their department has the usual complete exhibition of products. His appeal follows:

TO THE FARMERS OF CHRISTIAN AND ADJOINING COUNTIES:

On the twenty-seventh of this month, just one week from today, the Pennyroyal Fair will begin. Christian county has always taken a great deal of pride in the fact that the Pennyroyal Fair, since its beginning, has, by all odds, been the best Fair in Western Kentucky. Last year, our Agriculture Department was the feature of the Fair. Many people, who afterwards attended the State Fair, at Louisville, stated that there was nothing at the State Fair, in the line of Agricultural exhibits that compared with the display at the Pennyroyal Fair. This was due entirely to the interest and cooperation of the farmers of this and adjoining counties. We, of course, realize that the seasons this year have been very adverse to producing acceptable farm exhibits, but that is a matter of course beyond our control. The thing to do is for the farmers to bring in the best they have and make a display, if for no other purpose than that of helping us make a good show. Everybody will be on the same footing, as the weather conditions have been pretty generally the same throughout this section, so, get busy at once, and select and get ready to bring in the best you have of everything you are raising on the farm. We have plenty of exhibition space, and will be glad to hear from all who wish to make an exhibit right away, in order that we may allot the proper space. We feel sure that this appeal will not be in vain, as all of our people feel a great pride in our Fair. It is the patriotic duty of every farmer to manifest the proper interest in our Fair, for this will be to stimulate and encourage agriculture, and nothing could be more patriotic than to encourage farming of all kinds at this time.

The premiums this year are nearly double on all exhibits. Our business people and our Fiscal Court have been generous in donating money and other prizes for this purpose, so that it will not only be a fine thing to do, but also a profitable thing to do in making these exhibits.

An engine that went dead as the automobile reached the interurban tracks 18 miles east of Evansville resulted in all four passengers in the Ford being killed instantly. They were a man and three women.

000
The Norwegian bark Nordhaw was sunk by a German submarine 125 miles off the Virginia Capes Saturday. Her crew escaped in small boats and have been brought into an Atlantic port by an American warship.

000
The Germans troops which have been encountered in the past few days, especially during the operation of Monday night in which Outer-
steene ridge was captured and consolidated, seem to have lost greatly in fighting efficiency. Of nearly 700 Germans captured during the Outer-
steene operation, many surrendered tamely after securing their rations and personal belongings.

000
Details of the reported sinking of a German submarine by a British tank steamer, Friday, 300 miles off Nantucket, have been received. When first sighted, the submarine was two miles away, according to the captain of the tanker who said he immediately opened fire. Two shots from the submersible struck the British ship, one of them passing through the boiler room and the other through a tank. Neither of the shells exploded and did no material damage, the captain reported. Twenty-seven shots were fired by the tank ship, one or more of which her master declared, scored clean hits as flames were seen bursting from the port side of the submarine which he said, sank a few minutes later.

000
ENTERS WAR WORK.

Paducah, Ky., Aug. 19.—To enter Y. M. C. A. war work, John U. Robinson, of Paducah, will leave tonight for Chicago. Mr. Robinson returned Saturday evening from Fordyce, Ark., where he assisted Rev. Burke Culpepper in a successful meeting. At Chicago he will take a four weeks course of instruction preparatory to being assigned to a training camp in this country.

For the past four years Mr. Robinson has been engaged in evangelistic work, and during most of this time been associated with Rev. Burke Culpepper, as singer and choir director.

**36,000 ARRIVE AT PORT
IN ONE CONVOY****TWICE AS MANY AS WE SENT
TO CUBA DURING THE SPAN-
ISH-AMERICAN WAR.**

(By Associated Press)

American Port, Western France—
Twelve o'clock at night, all lights out
ashore and afloat, heavy rain squalls
sweeping out to sea, and this great
port dark and silent as the latest
fleet of American transports and
convoys—thirteen monster ships, ten
destroyers, 36,000 fighting men and
5,000 crew—creeps in from the At-
lantic.

With an American army escort we
had climbed to a high point on the
sea front to get a glimpse of this first
process in the gigantic military
migration from America to Europe,
the greatest the world has ever known
and then to follow it, step by step,
as its vast and intricate activities
unfolded up to the arrival of the men
on the fighting front.

The wireless station had received a
cipher message giving warning of the
approach of the fleet. It had been
hoped the arrival would be in day-
light, with flags flying, bands playing
and the sun shining as the Ameri-
can fighting men get their first glimpse
of Europe. But this is no dress par-
ade, said the admiral, and there is
no time for stage effects.

And so at midnight in the rain and
darkness with signal lights showing
for the first time since they left the
other side, the huge flotilla moved in
a long line of lights to the sheltered
roadstead. There was the creak of
windlass and chains as the anchors
grinned.

Midnight Arrives.

And yet this midnight arrival in the
darkness and rain is only one of the
steady successions of great armadas
coming every three and four days, in
the colossal American military influx
which Secretary Baker gives at 275,-
000 men for a single month. These

36,000 men just in are the population
of a good sized city; twice as many
men as we sent to Cuba for the Span-
ish-American war; about half the
force Napoleon had at Waterloo when
the destinies of Europe were in the
scale.

And while this is one of the record
debarments, yet it is only a small
part of that mighty stream coming
from the west. It is the unpre-
dicted magnitude of such a mili-
tary movement, across the ocean, in
the face of submarines, that has
thrilled the allied world and broken
the spirit of the adversary.

It was a stirring scene in the har-
bor the morning following as the
transports unloaded their 36,000
men. The sky had cleared and the
huge hulls of the transports loomed
out of the mist, their funnels puffing
black smoke, their sides painted with

fantastic camouflage, and their decks
rising like terraces crowded with
khaki-clad Americans in their broad
brimmed sombreros. The destroyers
had drawn off and were lying bunch-
ed ten across. They looked diminu-
tive besides the big ships, but their
power showed in the glint of guns
and the long, lean build like a grey-
hound stretched for action. Further
back were the French warships.

All about were innumerable small
craft, army and navy tugs, lighters,
lunches and a flotilla of fishing craft
huge sails of lace. Back of this wat-
er scene stretched the huge American

French Sugar Mills Destroyed

France must import sugar today,
most of it from this side of the ocean,
because the largest portion of French
sugar beet land is in German hands.
As a result, the French people have
been placed on a sugar ration of about
18 pounds a year for domestic use;
a pound and a half a month. This
photograph shows how the German

troops destroyed French sugar mills.
Thanks to the French rationing sys-
tem the annual consumption has been
cut to 600,000 tons, according to
reports reaching the United States Food
Administration. Before the war France
had an average sugar crop of about
750,000 tons of sugar and had some
left over for export.

warehouses, sprung up like mush-
rooms, until the whole front was
black with buildings and the skeletons
of more buildings. Already the lighters
were alongside and the soldiers
came tramping down the gangways
to go ashore.

No System of Big Docks.

The Americans found this port
without any system of big docks.
A few of the smaller ships can come
to the docks, but most of the unload-
ing from the deep-draught ships must
be by lighters. The American com-
manders are planning to change all
this, and soon the long breakwater
will be linked to the land by bridges,
thus creating at a stroke a huge dock-
ing system by which the American
troops will march straight ashore
from the ships.

Now the fighters were at the dock,
and with the tide out the men climbed
up twenty feet to the wharves.
As they fell in for the march to camp
they had an earnest quizzical look,
for this was the first sight these men
of the new world were taking of the
old world—most of them from Iowa,
Nebraska and the middle west.

FERTILIZER PROSPECTS.

Fertilizer manufacturers at a meet-
ing Monday with representatives of
the Kentucky Council of Defense and
the agricultural extension depart-
ment of State University, gave as-
surance that the supply of fertilizer
will be ample to meet the require-
ments of increased wheat produc-
tion, and that prices will be stab-
ilized.

Get Our Estimates First

No matter what you are going to paint—whether it's a big job or a small one—we believe we can save you money.

Or possibly you have a floor to wax—or wall paper to clean—or woodwork to varnish. If so, just call and see what we can do for you.

We have an unusually large and fresh stock of paints for all purposes—floor wax—floor oil—furniture polish—Kalsomine—enamel—brushes and supplies of all kinds.

J. O. COOK
DRUGGIST

GIRL CUTS OFF TRESSES SO AS TO BUY W. S. S.

Dayton, O.—Juanita Dowell, eleven, cut off her beautiful chestnut curls to help win the war. She then notified an officer of the National Security League that she wished the hair to be sold in Portland, Ore., and that the money be used in buying War Savings stamps. Gertrude Atherton, the author, made the first bid on the tresses at \$5. The child's explanatory letter is to be sold along with the hair to the highest bidder.

DEFECTS SPELL DEATH IN FLYING

Psychological as Well as Physiological Factors Responsible for Accidents.

SCIENTISTS EXPLAIN THEM

Some of the Qualities That Give Americans Superiority in Air Over Their Hun Opponents—Temperament Is Important.

IS AS FATAL AS WAR

Tuberculosis Kills as Many as Fall From Bullets.

Dr. Livingston Farrand Appeals to People to Enter Battle Against Disease.

New York.—Mortality from tuberculosis among the civilian population and in the armies of all the countries engaged in the war has at least approximated the total number of soldiers killed in battle, according to Dr. Livingston Farrand, director of the American commission for the prevention of tuberculosis in France.

That the people of America throw themselves into the winning of the war against tuberculosis with the same zeal with which they have buried themselves against the Hun is the burden of an appeal made by Doctor Farrand on the eve of his return to France.

"To make our country really safe we must first make it healthy," is the slogan Doctor Farrand suggests for this war against disease.

Of the men called to the colors by the first draft 50,000 were found to be tubercular. This is one of the striking indications of the prevalence of the disease.

"While the war has thus effectively disclosed conditions which existed before, rather than produced these conditions, it is also true that in indirect ways it has substantially increased the tubercular problem in the European countries involved," says Doctor Farrand.

"I refer not to the situation in the armies, where the mode of life often tends to reduce this disease, but to conditions which affect the civilian population."

Increased food, clothing and housing costs necessitating, among the lower wage groups, diminished quantity and quality and their resultant undernutrition, are given as contributing causes.

A nation-wide campaign against the disease and for adequate provision for rejected and discharged soldiers suffering from it is planned through 1,500 local societies of the National Tuberculosis association.

WOULD FIGHT HIS FATHER

Man Whose Sire Is Captain in Mun Army Seeks Enrollment With Yanks.

Denver, Colo.—In making application for the privilege of fighting with the American army in France, Eugene Casper, twenty-two, told Denver recruiting officers he would not hesitate to fire against a certain unit of the German army, of which his father is captain and in which two of his brothers are fighting. Casper, who has been in the United States less than three years, has received only his first papers in naturalization. He will not be admitted to military service at once. He is a son of Capt. Gustav Casper, of the German army. David Holsworth, a resident of Denver, former captain in the Kaiser's army, and an uncle of young Casper, has a son in the American army.

ACTS AMAZE ITALIANS

Yankee Flyers Credited with Great Heroism.

Exploits Quickly Win Honors Given by King Victor Emmanuel Himself.

Italian Army Headquarters.—The Italian command under whose direction the American flyers are working on the Italian front has only one fault to find with them. They never want to remain on the ground.

The exploits which brought five of the American airmen decorations cannot yet be published; but the value of their services may be judged from the fact that King Victor Emmanuel traveled to the section held by the Americans to make the presentation.

A few days ago Lieut. Alexander G. Craig of New York, while flying over Austrian territory, was attacked by a chase plane. By skillfully handling his own machine, after a few minutes of jockeying he put his adversary at a disadvantage and maneuvered his own gunner into such a position that a burst of machine gun fire shot the attacker dead and sent his plane to the ground in flames.

Lieut. Harry L. Holtz of Burley, Idaho, showed he could combine great courage in daring with a thorough understanding of Italian habits and customs. On his way back over the Austrian lines after a deep raid into enemy territory his plane was struck by a burst of shrapnel from anti-aircraft guns. One fragment lodged in the body of Holtz's wing, another tore a hole in the right wing, while a third splintered one of the left-wing spars, at the same time cutting one of the aileron control cables to such an extent that single strand of steel wire was left.

Lieutenant Holtz calmly pointed out his break to the Italian mechanic accompanying him. The mechanic, without a moment's hesitation, climbed out and fought his way to the wing against a tremendous wind pressure. Then, lying flat on his face and bracing his feet against the strip, he grasped the damaged cable with one hand on each side of the break.

Just when he was getting a grip on the last strand of the cable it parted and the value of his daring action was apparent. With the cable gone, the big airplane virtually was useless, but he coolly clung there, substituting his strength for it and enabling Lieutenant Holtz to bring the machine safely into Italian territory.

IN WATER 19 HOURS IS SAVED BY COFFIN

Indiana, Pa.—In the water for 19 hours and a portion of the time clinging to a rough boat which contained the casket of an American soldier who had died at sea was the experience of Frank S. Keppe of Advance, near here, following the sinking of the steamer President Lincoln, according to a letter from Keppe to his folks here.

WILL EAT CHESTNUT LOAF

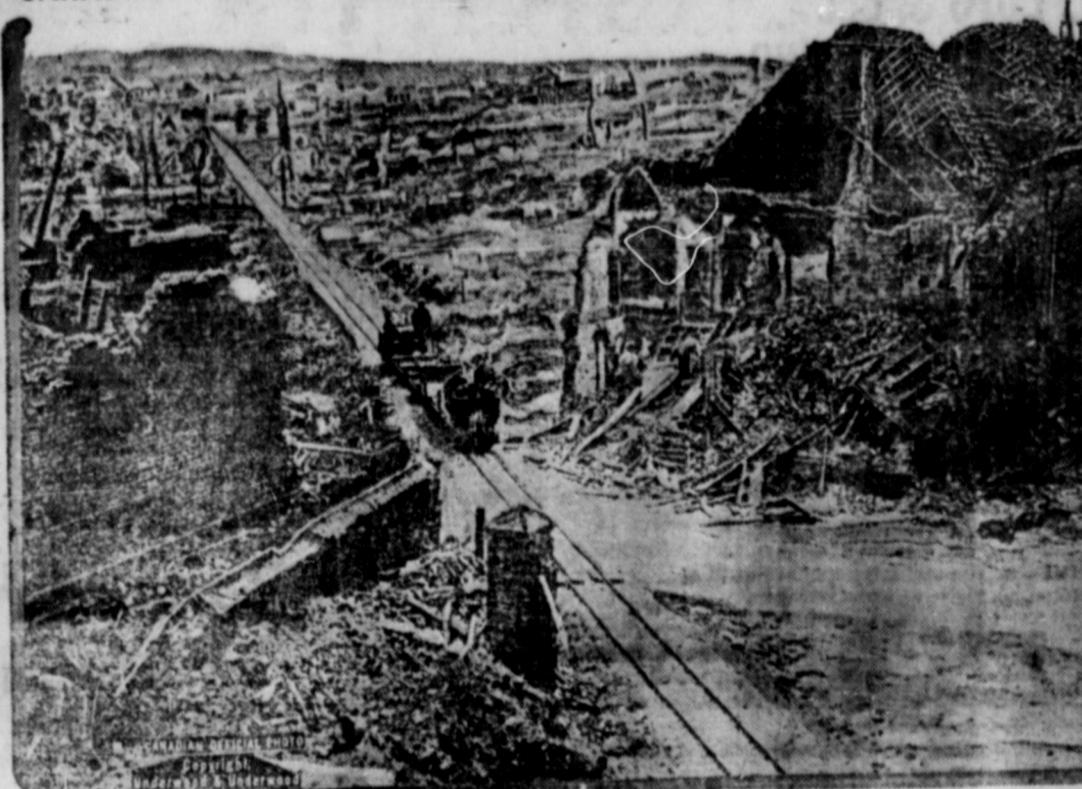

French Medical Professor Urges Use of New Ingredient in Making Bread.

Paris.—Doctor Labesse, professor in the medical school at Angers, urges the use of chestnuts in bread.

Chestnuts, which used to be sold in profusion in the streets of Paris, have disappeared from the market, he points out, and says a considerable saving in potatoes and wheat could be effected by using them in bread, according to a recipe which was demonstrated before the Academy of Sci-

The consensus of opinion of the people of the state of Connecticut, Utah, and a portion of Oregon and Washington.

CANADIAN TRAMWAY RUNNING THROUGH RUINED FRENCH VILLAGE

In this picture can plainly be seen the contrast between the Huns' destruction and the allies' construction. A corps of Canadian soldiers have made a clearing through the ruins and have built a tramway through the village. In other places in the photograph Canadians are seen salvaging through the ruins.

WHY TOBACCO CELEBRATE IS GOING UP LAFAYETTE'S BIRTHDAY

(By Associated Press.)

Danville, Va., Aug. 20.—The Danville tobacco market, one of the largest in the world, began the 1918 season Thursday August 15 with the prospects of breaking all previous records.

The increasing worldshortage in tobacco and the fact that the manufactured article has come to be a regular ration for U. S. troops in

troops for the American troops in the field, lead dealers to believe that the prices of last year will be eclipsed.

Knowing the demand for tobacco planters are cutting each leaf carefully this year and the coarse leaves at the base of the stalk which in years gone by were frequently left on the field are being picked one by one and saved.

Danville will have the basket sale system this year for the first time. Thirty thousand shallow wicker baskets have been procured and in these the tobacco will be placed on the warehouse floors. They will greatly expedite the clearing of the floors and this is a great consideration when the shortage of labor is recalled.

One picturesque feature for the tobacco market is gradually becoming lost. The tobacco wagons, closely resembling the western prairie schooner with its flared canvas top are being displaced by automobiles. Scores of farmers have invested in light trucks and some even load the tonneaus of their touring cars.

RESOLUTIONS.

George Franklin Shelton was born in Trigg county, Kentucky, August 18, 1856. When 21 years old he was made a Master Mason in J. C. Whitlock Lodge No. 487, F. & A. M. When he moved to Christian county he changed his membership to James Moore Lodge No. 230 of Pee Dee. In 1907 on account of it being nearer his home, he affiliated with the Hopkinsville Lodge No. 37.

In 1877 Brother Shelton married Miss Jessie Wilgus. After her death he married (in 1881) Miss Lou Robertson. She and four daughters survive him. Brother Shelton in his early youth became a member of the Baptist church and through life was a true and faithful gentleman.

Whereas, at his residence on East 21st St. in Hopkinsville, Ky., Saturday, Aug. 3, 1918, our Brother Shelton was called from this life to the Celestial Lodge above, therefore be it

Resolved, that in his death Hopkinsville Lodge No. 37 has lost a true and faithful brother, his wife a devoted husband, his children a kind and loving father, his associates an honest, truthful and loving friend and his country a loyal and upright citizen.

Resolved, that this lodge extend to his wife and children their most heartfelt sympathy.

Resolved, that these resolutions be spread upon the minutes of this lodge and a copy furnished the Hopkinsville papers for publication.

Respectfully submitted,

D. D. McMath,
J. A. Orange,
A. M. Henry,
Comm.

LITTLE GIRL KILLED.

Lightning striking the telephone battery caused the death of the nine year old daughter of Mr. and Mrs. Stephen Douglas, of near Guthrie. The child was severely burned

Lightning struck a barn in Warren county killing a mule and setting fire to a pile of hay. Two men in the barn were unburnt and put out the hay and saved the barn.

FIGHTING ON NOTED SPOTS

Headquarters American Troops with the British Forces in France, Aug. 10.—(Correspondence of the Associated Press) American soldiers during their brief leisure moments, are wandering through ruins and over fields made familiar to students of history by centuries of wars and revolutions. Some of them have already fought on the scene of some of Napoleon's operations in the region of the Marne.

Some are training over ground where the Normans fought the French and where the French fought the Spaniards. Later, they will, perhaps, be marching in line of battle over the country where the French and the Germans have fought again and again and where they will help the French and the British and the last of the wars to devastate the smiling valleys of France for centuries to come.

Nearly the entire history of France is pictured all over the areas occupied by the Americans in ancient churches which, along with object lessons in history will give the attentive soldier an enlarged appreciation of art and architecture.

Asked to what extent the man profiting from these opportunities, an officer of the American forces said that after getting located the soldier takes the first opportunity to explore the neighborhood. To use one of the British terms that are taking root among the overseas men they "push off" into all the nooks and corners. If their conceptions of what they see are often vague at first they soon get the habit of observation which develops into taste and in a goodly number of cases becomes a study.

It seems very right and fitting that Americans should honor Lafayette on September 6th out of the gratitude that is strong, that will never wither or die in the heart of Americans and I urge all patriotic Americans to do their part toward seeing that this day is fittingly observed throughout the country. Through Lafayette and his devotion to our cause, France and the United States fought shoulder to shoulder at Yorktown, and through their co-operation the independence of the struggling colonies was realized and the liberty of a whole continent assured.

"Today we plan to celebrate the birth of Lafayette, his country is taking part once more in a war of independence, a war which will save, and has already saved civilization and free institutions from the menace of autocracy and militarism. The Battle of the Marne fought and won by Lafayette's countrymen, Joffre, makes of the 6th day of September a date memorable not only in the history of our country but in the annals of civilization. In this year we are preparing in some modicum to pay the immeasurable debt we owe to France and Frenchmen.

"It is the hope of the American Defense Society that every man, woman and child in the United States will become interested in perpetuating Lafayette's memory. We urge that Statues of Lafayette be decorated throughout the nation on September 6.

"For nearly a century and a half our speech in America has evinced our gratitude to Lafayette and what he stands for. Now let our acts on September 6 attest the sincerity of our words."

CLOSE CALL.

Lightning struck a barn in Warren county killing a mule and setting fire to a pile of hay. Two men in the barn were unburnt and put out the hay and saved the barn.

MUSTARD GAS WORST

Most Horrible Invention Huns Use in War.

It Brings Tears and Causes Painful Skin Diseases Among Soldiers.

Washington.—The most dangerous kind of poison gas used by the Germans is "mustard gas," or dichloro diethylsulfide.

Mustard gas has a distinctive but not altogether unpleasant smell, more like garlic than mustard. It is heavy and oily as a liquid. It boils at 217 degrees centigrade, and thus has properties whereby it can be distributed in the form of a spray on the impact of a shell.

Mustard gas is a powerful producer of tears. After several hours the eyes begin to swell and blister, causing intense pain. The nose discharges freely, and severe coughing and vomiting ensue.

Direct contact with the spray causes blistering of the skin, and the vapor penetrates through the clothing. Gas masks, of course, do not protect against this. The symptoms are similar to pneumonia—high fever, heavy breathing and often stupor.

The damage done by mustard gas is a slow and insidious development. The breaking down of the affected tissues is slow, the height being reached from five to ten days after the burn is received. The painlessness is also a marked characteristic. Healing is slow.

Mustard gas besides being used in direct attack, is also used for "neutralization." For instance, where supplies and ammunition are being brought up, a few mustard gas shells will result in dangerous confusion and delay. A part of the infantry is "neutralized" by having food and ammunition cut down. If the shell hits as well as neutralizes, so much the better.

The American mask to fight mustard gas is of the box respirator type. The hood is of rubber. Breathing is through the mouth, pincers shutting off the nostrils. The gas-charged air enters through the bottom of the canisters, where by means of neutralizing chemicals, it is purified. From the canister the air is drawn into the lungs.

There is a one-way shutter valve in the hood through which the air comes out. This mask is designed to last ten hours. For artillerymen the war department has made an oil suit which encloses the soldier bodily.

COLOSSAL ITALIAN COLONEL

This massive looking specimen of man is big enough to take one's breath away. The most recent jibe directed at tall men, "Aw, you're too big to fit in the trench," is smashed to smithereens, as this picture shows.

The "giant" is an Italian colonel, who is paying a visit to the Italian sector in France. The Italians on the western front have been giving a good account of themselves and are cooperating with the French on this front to stop the German drive just started.

EGGS 40 CENTS EACH.

(By Associated Press.)

Amsterdam, Aug. 20.—The Prussian Statistical Department has issued a return giving the average retail prices of articles of food for towns over 10,000 inhabitants in May 1918. Following are some of the prices in marks, showing considerable rises compared with May 1917.

1918 1917

Potatoes, per kilogram (2.20 pounds) .24 0.13
Butter, per kilogram .60 5.40
Milk, per quart .52 0.30
Eggs, each .40 0.25
Rye flour, per kilogram .54 0.51
White bread, per kilogram .58 0.55
Sugar, per kilogram .92 0.58
